The average annual salary of a software engineer and a senior web developer is around $80, 000, with the more established ones earning as much as $100,000. Those figures wouldn't exactly make you a millionaire overnight, but you can't deny that they are more than enough to live comfortably. Those positions require a good knowledge of Javascript and even if you're not looking for those posts specifically, especially since web development is a huge component not just of modern information technology, but also modern commerce.

Javascript programming is an essential skill in web development because it is THE programming language used in order to create dynamic web pages – the kind that is required for almost every ecommerce undertaking. It is also used in creating web applications. This ebook will help you get a good grasp of Javascript and get you on your way to learning and eventually mastering the language.

This ebook includes:

• A section on what to expect and what to prepare so you don't go in blind

• The fundamentals and key concepts of Javascript programming such as Variables, identifiers, and statements that will enable you to grant your web pages dynamism

• A detailed discussion of Javascript syntax so you can get started with scripting and creating valid statements

• Dedicated chapters on AJAX and other vital components of interactive web pages

• A discussion on Document Object Model so you can effectively use Javascript with HTML (this is especially important because this programming language views almost everything as an object.

• Solid explanations that come with samples

Those are just some of the things you will learn in this e-book. Don't get left behind. Turn the page and start learning JavaScript Programming.
