A 23 page demonstration of proficiency in somatoform disorders and diagnostic applicability, part of the broad overview of the biological bases of behavior containing my experiential-based, critical opinion corroborating and occasionally challenging DSM-IV descriptions of neurophysiological, neurochemical, hormonal influenced definitions of Somatization Disorder, Undifferentiated Somatoform Disorder, Conversion Disorder, Pain Disorder, Hypochondriasis, Body Dysmorphic Disorder, Somatoform Disorder Not Otherwise Specified and how they may affect learning, memory and emotions as well as the treatment itself. I perused during the research for this work—but may have not quoted verbatim or used information from—the American Psychological Association’s, DSM-IV, Judith Herman’s, Trauma and Recovery: The Aftermath of Violence, experiential-based conversations with my former clinical director, Lisa Gecky, MS., Turning Point Recovery Center in Otter Lake, Michigan and Dr. V. Michael McKenzie, PhD., author of Violence in America/my former Executive Director from Bridges of America Treatment Center (Florida) as well as my colleagues working with Chemical Dependency and criminal behaviors in my present position as Director of Clinical Services at New Paths Inc., a 28 year-old, criminal behavior/chemical dependency oriented, 200 bed community corrections facility in Michigan.
