## Pseudo-Differential Operators and Related Topics (Operator Theory: Advances and Applications)

As a satellite conference to the Fourth Congress of European Mathematics held at Stockholm University in 2004, the International Conference on Pseudo-Differential Operators and Related Topics was held at Växjö University in Sweden from June 22 to June 25, 2004. The conference was supported by Växjö University, the FIRB Research Group on Microlocal Analysis of Università di Torino, and the International Society for Analysis, its Applications and Computation (ISAAC). The conference was well attended by about 50 mathematicians from Bulgaria, Canada, Denmark, England, Finland, Germany, Italy, Japan, Mexico, Serbia and Montenegro, Russia and Sweden. The conference covered a broad spectrum of topics related to pseudo-differential operators such as partial differential equations, quantization, Wigner transforms and Weyl transforms on Lie groups, mathematical physics, time-frequency analysis and stochastic processes. The speakers were enthusiastic about the prospect of publishing articles based on their presentations in a volume to be published in Professor Israel Gohberg's prestigious series entitled "Operator Theory: Advances and Applications". All contributions from speakers have been carefully refereed and the articles collected in this volume give a representative flavour of the mathematics presented at the conference. This volume is a permanent record of the conference and a valuable complement to the volume "Advances in Pseudo-Differential Operators" published in the same series in 2004, which is devoted to the Special Session on Pseudo-Differential Operators at the Fourth ISAAC Congress held at York University in August 2003.

Operator Theory: Advances and Applications, Vol. 164, 1-21 © 2006 Birkhäuser Verlag Basel/Switzerland

Strongly Elliptic Second Order Systems with Spectral Parameter in Transmission Conditions on a Nonclosed Surface M. S.

### **From reader reviews:**

#### **James Collis:**

The particular book Pseudo-Differential Operators and Related Topics (Operator Theory: Advances and Applications) will bring you to definitely the new experience of reading any book. The author style to clarify the idea is very unique. Should you try to find new book to read, this book very ideal to you. The book Pseudo-Differential Operators and Related Topics (Operator Theory: Advances and Applications) is much recommended to you to see. You can also get the e-book in the official web site, so you can more easily to read the book.

#### **Linda Wood:**

Reading a e-book tends to be new life style in this era globalization. With looking at you can get a lot of information that could give you benefit in your life. Together with book everyone in this world may share their idea. Publications can also inspire a lot of people. Many author can inspire their very own reader with their story or even their experience. Not only situation that share in the ebooks. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors on this planet always try to improve their ability in writing, they also doing some study before they write to the book. One of them is this Pseudo-Differential Operators and Related Topics (Operator Theory: Advances and Applications).

#### **Lila Johnson:**

Playing with family within a park, coming to see the marine world or hanging out with close friends is thing that usually you will have done when you have spare time, in that case why you don't try point that really opposite from that. I activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Pseudo-Differential Operators and Related Topics (Operator Theory: Advances and Applications), you may enjoy both. It is very good combination right, you still would like to miss it? What kind of hang type is it? Oh can occur its mind hangout folks. What? Still don't understand it, oh come on its referred to as reading friends.

#### **Dennis Sellers:**

In this time globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher which print many kinds of book. The particular book that recommended to you is Pseudo-Differential Operators and Related Topics (Operator Theory: Advances and Applications) this reserve consist a lot of the information in the condition of this world now. This kind of book was represented so why is the world has grown up. The dialect styles that writer value to explain it is easy to understand. The writer made some analysis when he makes this book. Here is why this book

acceptable all of you.
