Robert Alexander Peddie

Engineering and Metallurgical Books, 1907-1911 (Classic Reprint) Robert Alexander Peddie
Excerpt from Engineering and Metallurgical Books, 1907-1911

The works included in this bibliography are only to be found by the laborious process of examining the various records of books published in Great Britain and the United States. Even these records are not exhaustive, some publishers failing to notify the public of the fact that they have published a book. In this volume I have brought together all the discoverable titles of publications on Engineering and Metallurgy issued in the English language during the years 1907-1911. They have been placed under the most specific subject headings, and these subject headings have been arranged in alphabetical order. For the further assistance of the reader I have added an index of authors' names and a table showing the subject headings in classified order.

I have received considerable help from Mr. E. J. Rogers, the librarian of the Institution of Mechanical Engineers, and from Mr. Charles Spon, who was good enough to read the proofs. To both these gentlemen I have to express my best thanks.

I shall be glad to receive notes of any books not included, in order that the titles may be published in the supplement for 1912, which is in preparation.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
