Liberation Ecologies

Liberation Ecologies

At the beginning of the 21st century, the environment and the future of development continue to be issues of crucial importance. Most explanations of environmental crisis emphasize the role of population growth, thus focusing their attention on the poor. By comparison, *Liberation Ecologies* elaborates a political-economic explanation drawing from the most recent advances in social theory. The new edition has been extensively revised to reflect recent changes in debates over the real definitions of 'development' and 'environment', and contains nine completely new chapters.
