Design of Steel Transmission Pole Structures, ASCE/SEI 48-05

"ASCE/SEI 48-05, Design of Steel Transmission Pole Structures" specifies requirements for the design, testing, assembly, and erection of cold-formed tubular members and connections for steel electrical transmission pole structures. Topics discussed in this standard include: loading, geometry, and analysis; design of members; design of connections; detailing and fabrication; testing; structural members and connections used in foundations; quality assurance/quality control; and assembly and erection. Also included are a supplementary commentary section and appendices. The primary resource document for the development of this standard is "ASCE Manual 72".
