Tales from the Madhouse: An insider critique of psychiatric services Gary Sidley

Current psychiatric practices are based on pseudo-scientific assumptions that are barely more valid than those of witchcraft and demonic possession that dominated society's approach to madness in bygone centuries. The author's 33 years of experience working as a mental health professional - psychiatric nurse, clinical psychologist and manager - has enabled the creation of a distinctive insider account of the shameful failings of the Western psychiatric system. Not only is the evidence for psychiatry's deficiencies comprehensively reviewed, but disturbing anecdotes are shared to illustrate how these failings are currently playing out within a psychiatric service near you.
