Hans Petter Langtangen

A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering)

Hans Petter Langtangen

The book serves as a first introduction to computer programming of scientific applications, using the high-level Python language. The exposition is example- and problem-oriented, where the applications are taken from mathematics, numerical calculus, statistics, physics, biology, and finance. The book teaches "Matlab-style" and procedural programming as well as object-oriented programming. High school mathematics is a required background, and it is advantageous to study classical and numerical one-variable calculus in parallel with reading this book. Besides learning how to program computers, the reader will also learn how to solve mathematical problems, arising in various branches of science and engineering, with the aid of numerical methods and programming. By blending programming, mathematics and scientific applications, the book lays a solid foundation for practicing computational science.

From reader reviews:

Paul Howard:

What do you ponder on book? It is just for students as they are still students or this for all people in the world, what best subject for that? Simply you can be answered for that query above. Every person has distinct personality and hobby for every other. Don't to be forced someone or something that they don't wish do that. You must know how great and also important the book A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering). All type of book would you see on many methods. You can look for the internet options or other social media.

Gary Sandler:

This book untitled A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering) to be one of several books in which best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit on it. You will easily to buy this specific book in the book store or you can order it via online. The publisher with this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Cell phone. So there is no reason for you to past this reserve from your list.

Rebecca Kurtz:

People live in this new morning of lifestyle always try to and must have the free time or they will get lot of stress from both lifestyle and work. So , if we ask do people have free time, we will say absolutely indeed. People is human not a robot. Then we ask again, what kind of activity do you have when the spare time coming to a person of course your answer may unlimited right. Then do you try this one, reading publications. It can be your alternative in spending your spare time, often the book you have read is definitely A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering).

Blanche Dobos:

Do you have something that that suits you such as book? The publication lovers usually prefer to select book like comic, quick story and the biggest one is novel. Now, why not attempting A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering) that give your entertainment preference will be satisfied through reading this book. Reading addiction all over the world can be said as the opportunity for people to know world far better then how they react in the direction of the world. It can't be stated constantly that reading addiction only for the geeky man or woman but for all of you who wants to become success person. So , for all of you who want to start examining as your good habit, you are able to pick A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering) become your own personal starter.
