Michel Lapidus, Machiel van Frankenhuijsen

Fractal Geometry, Complex Dimensions and Zeta Functions: Geometry and Spectra of Fractal Strings (Springer Monographs in Mathematics) Michel Lapidus, Machiel van Frankenhuijsen

Number theory, spectral geometry, and fractal geometry are interlinked in this in-depth study of the vibrations of fractal strings, that is, one-dimensional drums with fractal boundary.

Throughout *Geometry, Complex Dimensions and Zeta Functions*, Second Edition, new results are examined and a new definition of fractality as the presence of nonreal complex dimensions with positive real parts is presented. The new final chapter discusses several new topics and results obtained since the publication of the first edition.

From reader reviews:

Cassandra Martin:

This Fractal Geometry, Complex Dimensions and Zeta Functions: Geometry and Spectra of Fractal Strings (Springer Monographs in Mathematics) are reliable for you who want to become a successful person, why. The key reason why of this Fractal Geometry, Complex Dimensions and Zeta Functions: Geometry and Spectra of Fractal Strings (Springer Monographs in Mathematics) can be one of the great books you must have is usually giving you more than just simple looking at food but feed anyone with information that maybe will shock your previous knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions at e-book and printed kinds. Beside that this Fractal Geometry, Complex Dimensions and Zeta Functions: Geometry and Spectra of Fractal Strings (Springer Monographs in Mathematics) forcing you to have an enormous of experience such as rich vocabulary, giving you test of critical thinking that we all know it useful in your day pastime. So , let's have it and enjoy reading.

Raymond Albanese:

People live in this new time of lifestyle always make an effort to and must have the time or they will get lot of stress from both day to day life and work. So , once we ask do people have extra time, we will say absolutely of course. People is human not really a robot. Then we ask again, what kind of activity do you have when the spare time coming to a person of course your answer will certainly unlimited right. Then do you try this one, reading ebooks. It can be your alternative inside spending your spare time, often the book you have read is actually Fractal Geometry, Complex Dimensions and Zeta Functions: Geometry and Spectra of Fractal Strings (Springer Monographs in Mathematics).

Brett Nash:

Are you kind of active person, only have 10 or maybe 15 minute in your time to upgrading your mind skill or thinking skill possibly analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your small amount of time to read it because this all time you only find book that need more time to be examine. Fractal Geometry, Complex Dimensions and Zeta Functions: Geometry and Spectra of Fractal Strings (Springer Monographs in Mathematics) can be your answer because it can be read by an individual who have those short extra time problems.

Michael Sherman:

Book is one of source of expertise. We can add our know-how from it. Not only for students but in addition native or citizen need book to know the up-date information of year to be able to year. As we know those publications have many advantages. Beside many of us add our knowledge, may also bring us to around the world. With the book Fractal Geometry, Complex Dimensions and Zeta Functions: Geometry and Spectra of Fractal Strings (Springer Monographs in Mathematics) we can acquire more advantage. Don't someone to be

creative people? To get creative person must choose to read a book. Simply choose the best book that suited with your aim. Don't be doubt to change your life by this book Fractal Geometry, Complex Dimensions and Zeta Functions: Geometry and Spectra of Fractal Strings (Springer Monographs in Mathematics). You can more inviting than now.
