## Protein Expression: A Practical Approach (The Practical Approach Series)

Part of a mini-series on the synthesis and processing of proteins, this volume details the expression of cloned D.N.A. and R.N.A. templates in all of the major in vivo and in vitro systems. The in vivo systems covered are cultured mammalian cells, the yeasts *Saccharomyces cerevisiae* and *Pichia pastoris*, baculovirus, *Xenopus* oocytes, and prokaryotic cells. It also covers cell-free systems of both eukaryotes and prokaryotes, including prokaryotic systems that offer coupled transcription-translation. The volume concludes with a chapter on monitoring protein expression.
