Seedling diseases of sugar beets and their relation to root-rot and crown-rot; Histological relations of sugar-beet seedlings and *Phoma betae* ; ... fungus parasitic on sugar beets and radishes Howard Austin Edson

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 Excerpt: ... the cause of a disease of radishes. The first cultures of the fungus temporarily mistaken for *A. laevis* were secured from damped-off beet seedlings grown in soil which had previously produced the black-root disease of the radish, like those shown in Plate XXIV, figure 2. It was later obtained from soils at Madison, and from Kenosha, Wis., as well as from seedlings damping-off in soil which had been infected with fragments of a diseased radish obtained from Illinois. The causal relation of the organism to the radish disease as well as to damping-off of sugar-beet seedlings was confirmed repeatedly by inoculation experiments, and it was at first thought possible that the discrepancies between this fungus and published descriptions of *A. laevis* might be the result of response to the changed environmental conditions of culture or to variations within the species, since it is well known from the study of many investigators that the Saprolegniaceae are exceedingly variable. Through the courtesy of the Kaiserliche Biologische Anstalt at Dahlem, Germany, and Dr. Leo Peters, of that institution, the author was permitted to isolate *Aphanomyces* from the experimental fields of the Anstalt. An organism was secured from damped-off seedlings, which Dr. Peters identified as the organism with which he had worked and which conformed in every respect to De Bary's description of *A. laevis*. It was secured in pure culture, and its pathogenicity to beet seedlings was confirmed by inoculation experiments. Unfortunately the culture was lost before it had been tested upon the radish and thereafter could not be secured again. The morphological studies, however, prove that the American fungus with which we have been working is not *A. laevis*, but a hitherto undescribed organism. Morph...

From reader reviews:

Daryl Biddle:

Hey guys, do you wish to find a new book to see? Maybe the book with the name Seedling diseases of sugar beets and their relation to root-rot and crown-rot; Histological relations of sugar-beet seedlings and Phoma betae ; ... fungus parasitic on sugar beets and radishes suitable to you? Often the book was written by a popular writer in this era. The actual book is titled Seedling diseases of sugar beets and their relation to root-rot and crown-rot; Histological relations of sugar-beet seedlings and Phoma betae ; ... fungus parasitic on sugar beets and radishes is a single of several books that everyone reads now. This kind of book was inspired a number of people in the world. When you read this book you will enter the new age that you ever know ahead of. The author explained their thought in the simple way, therefore all of people can easily know the core of this book. This book will give you a great deal of information about this world now. In order to see the represented of the world on this book.

Curtis Monahan:

This Seedling diseases of sugar beets and their relation to root-rot and crown-rot; Histological relations of sugar-beet seedlings and Phoma betae ; ... fungus parasitic on sugar beets and radishes is a great e-book for you because the content which is full of information for you who all always deal with world and also have to make decision every minute. That book reveals its info accurately using great coordinate words or we can state no rambling sentences inside it. So if you read that hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but tough core information with attractive delivering sentences. Having Seedling diseases of sugar beets and their relation to root-rot and crown-rot; Histological relations of sugar-beet seedlings and Phoma betae ; ... fungus parasitic on sugar beets and radishes in your hand like keeping the world in your arm, data in it is not ridiculous just one. We can say that no publication that offers you world throughout ten or fifteen seconds right but this publication already does that. So, this can be a good reading book. Hey Mr. and Mrs. active do you still doubt in which?

Frederick Cagle:

In this period of globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You will see that now, a lot of publishers that will print many kinds of book. The actual book that recommended to you is Seedling diseases of sugar beets and their relation to root-rot and crown-rot; Histological relations of sugar-beet seedlings and Phoma betae ; ... fungus parasitic on sugar beets and radishes this publication consists a lot of the information of the condition of this world now. This book was represented so why is the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. The actual writer made some exploration when he makes this book. That is why this book is suitable all of you.

Jared Carter:

As a student exactly feel bored to be able to reading. If their teacher asked them to go to the library or to make summary for some publication, they are complained. Just little students that has reading's internal or real their pastime. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that reading is not important, boring and can't see colorful photos on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Seedling diseases of sugar beets and their relation to root-rot and crown-rot; Histological relations of sugar-beet seedlings and *Phoma betae* ; ... fungus parasitic on sugar beets and radishes can make you experience more interested to read.
