Metabolic Phenotyping in Personalized and Public Healthcare

Metabolic Phenotyping in Personalized and Public Healthcare

Metabolic Phenotyping in Personalized and Public Healthcare provides information on the widespread recognition that a personalized or stratified approach to patient treatment may offer a more efficient and effective healthcare solution than phenotype-led approaches.

In order to achieve that objective, a deep personal description is required at the level of the genome, proteome, metabolome, or preferably a combination of these aided by technology. This book, edited and written by the outstanding luminaries of this evolving field, evaluates metabolic profiling and its uses across personalized and population healthcare, while also covering the advent of new technology fields, such as surgical metabonomics.

In addition, the text presents specific examples of where this technology has been used clinically and with efficacy, pointing towards a framework and protocol for usage as it hits the clinical mainstream.

- Translates the conjunction of new surgical tools for intraoperative, real-time, metabolite evaluation and direct analysis of biofluid samples into novel options for augmented clinical decision-making
- Discusses longitudinal sampling from individual patients for stratified medicine
- Covers high resolution analytical spectroscopy and sophisticated computational modelling for prediction of adverse reactions in critical care scenarios, prognostic evaluation of cancer from biofluidism, and prognostic prediction of metabolism or response of patients to pharmaceutical interventions
- Encapsulates recent technology options for broader population profiling considerations, in particular, the metabolome-wide association studies (MWAS) that aid the translational researcher in identifying metabolic patterns associated with disease
- Foreword written by Professor Dame Sally Davies who is the Chief Medical Officer for England

From reader reviews:

Ashley Mansfield:

Often the book Metabolic Phenotyping in Personalized and Public Healthcare will bring someone to the new experience of reading any book. The author style to clarify the idea is very unique. In the event you try to find new book you just read, this book very acceptable to you. The book Metabolic Phenotyping in Personalized and Public Healthcare is much recommended to you to read. You can also get the e-book in the official web site, so you can more readily to read the book.

Juan McCain:

Your reading 6th sense will not betray anyone, why because this Metabolic Phenotyping in Personalized and Public Healthcare book written by well-known writer who knows well how to make book that could be understand by anyone who have read the book. Written in good manner for you, dripping every ideas and creating skill only for eliminate your hunger then you still hesitation Metabolic Phenotyping in Personalized and Public Healthcare as good book not only by the cover but also through the content. This is one publication that can break don't determine book by its cover, so do you still needing yet another sixth sense to pick this!? Oh come on your reading sixth sense already told you so why you have to listening to an additional sixth sense.

Margaret Burman:

In this age globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher this print many kinds of book. The particular book that recommended for your requirements is Metabolic Phenotyping in Personalized and Public Healthcare this book consist a lot of the information on the condition of this world now. That book was represented how do the world has grown up. The terminology styles that writer require to explain it is easy to understand. The particular writer made some research when he makes this book. That's why this book appropriate all of you.

Christine Knox:

Many people spending their period by playing outside with friends, fun activity with family or just watching TV all day long. You can have new activity to spend your whole day by reading a book. Ugh, you think reading a book can definitely hard because you have to accept the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Smartphone. Like Metabolic Phenotyping in Personalized and Public Healthcare which is getting the e-book version. So , why not try out this book? Let's notice.
