## Doing Narrative Research

Examining narrative methods in the context of its multi-disciplinary social science origins, this text looks at its theoretical underpinnings, while retaining an emphasis on the process of doing narrative research. The authors provide a comprehensive guide to narrative methods, taking the reader from initial decisions about forms of narrative analysis, through more complex issues of reflexivity, interpretation and the research context.

The contributions included here clearly demonstrate the value of narrative methods for contemporary social research and practice. This book will be invaluable for all social science postgraduate students and researchers looking to use narrative methods in their own research.
