The Microbial Balancing Program connects humans and nature in a new and intimate way. In this program, human health and balance are achieved by focusing not on the human, but on the health and balance of the vast and vibrant population of living organisms called microbes. Up to now, we have developed a highly adversarial relationship with viruses, fungi, bacteria and protozoa. We control them by killing them. After all, we humans are a lot bigger than they are and killing the "little buggers" should not be an issue for us. In the Microbial Balancing Program, we turn 180 degrees from this thinking and deal with human health issues by cooperating with and ensuring the balance and well being of the "little buggers." We make peace, not war. . . . Instead of attempting to dominate and control viruses, fungi, bacteria and protozoa, we can use cooperation and care. We can change our attitude and how we approach our relationship with microbes. As a result of our changes! , we can turn infectious disease on its ear.
