# Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series)

*Bud Fox Ph.D., Zhang Wenzu Ph.D., Tan May Ling M.Sc.*

**Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series)** Bud Fox Ph.D., Zhang Wenzu Ph.D., Tan May Ling M.Sc.

**Software Application Development: A Visual C++, MFC, and STL Tutorial** provides a detailed account of the software development process using Visual C++, MFC, and STL. It covers everything from the design to the implementation of all software modules, resulting in a demonstration application prototype which may be used to efficiently represent mathematical equations, perform interactive and intuitive model-building, and conduct control engineering experiments.

All computer code is included, allowing developers to extend and reuse the software modules for their own project work. The book's tutorial-like approach empowers students and practitioners with the knowledge and skills required to perform disciplined, quality, real-world software engineering.

**From reader reviews:**

**David Hernandez:**

The book Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) can give more knowledge and information about everything you want. Why then must we leave the good thing like a book Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series)? A few of you have a different opinion about publication. But one aim that will book can give many information for us. It is absolutely correct. Right now, try to closer using your book. Knowledge or info that you take for that, you can give for each other; it is possible to share all of these. Book Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) has simple shape however, you know: it has great and large function for you. You can appear the enormous world by open up and read a e-book. So it is very wonderful.

**Charles Owens:**

This book untitled Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) to be one of several books that best seller in this year, this is because when you read this book you can get a lot of benefit onto it. You will easily to buy that book in the book store or you can order it via online. The publisher of the book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Smartphone. So there is no reason for you to past this guide from your list.

**Cleta Blackwell:**

Is it a person who having spare time in that case spend it whole day by simply watching television programs or just lying down on the bed? Do you need something new? This Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) can be the solution, oh how comes? A book you know. You are and so out of date, spending your free time by reading in this brand-new era is common not a geek activity. So what these guides have than the others?

**Andre Barrett:**

As a student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or even make summary for some guide, they are complained. Just tiny students that has reading's internal or real their pastime. They just do what the professor want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that studying is not important, boring and also can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Software Application Development: A Visual C++, MFC, and STL Tutorial

(Chapman & Hall/CRC Computer and Information Science Series) can make you feel more interested to read.
